Professional Summary

I am a **Software Developer** with 8 months of experience in developing web applications. I have strong skills in **React**, **Next.js**, **C++ (basics)**, and **TailwindCSS**, and I possess practical experience in building online systems and interactive platforms. My goal is to continue growing as a proficient **software developer** and to contribute to creating high-quality products for users.

Skills

JavaScript • TypeScript • React • Next.js • C++ (basic) • Redux Toolkit • RTK Query • Jotai • Zustand • SASS • Tailwind CSS • HTML • CSS

Education

Softclub Academy Dushanbe, Tajikistan
Present

I am currently learning **Next.js**, and in 10 days I will finish the Softclub Academy.
Here, I am learning **C++ (basics)**, **HTML**, **CSS**, **SASS**, **TailwindCSS**, **JavaScript**, **React**, **Next.js**, **Redux Toolkit**, **Jotai**, **Zustand**, **Figma**, and **working with the backend**. I am having such a great time here!

School №90 Dushanbe, Tajikistan
Present

I've participated in several academic competitions, like [Globus etc]. I didn't always win, but I learned a lot and improved my problem-solving and teamwork skills. Overall, I enjoy challenging myself and applying what I've learned in practical ways.

Projects

1. **Comfy**
[Github](#)
In this project, I used **JavaScript**, **HTML**, and **TailwindCSS**. I didn't use any JavaScript frameworks or libraries for the core functionality. The website allows users to buy almost anything. I also used **Axios** to interact with a **Mock API**.
4. **Fastcart – E-commerce Website**
[Demo](#) | [Github](#)
In this project, I used **JavaScript** with **React**, **TailwindCSS**, and **Redux Toolkit** for the **UI**. The website allows users to buy almost anything. I also used **Ant Design (Antd)**, **Material-UI (MUI)**, and **Swiper** for additional styling and functionality.
3. **Instagram Clone (Team Project)**
[Demo](#) | [Github](#)
In this project, I used **JavaScript** with **React**, the **Next.js** framework, and **TailwindCSS**. My role was to complete the messaging feature. I finished it, but the only problem was that the backend didn't support real-time updates. I also used **Material-UI (MUI)** and **Swiper** for additional styling and functionality.

Languages

1. **Native Tajik** -excellent proficiency
2. **Russian** -[normal](#)
3. **English** -[Pre-Intermediate \(B2–A1\)](#)
